9. ☐ Other \_\_\_\_.

**Reason for Allowance**

1. The following is an examiner's statement of reasons for allowance:

For claim 1, and similarly claims 9, and 10, the prior art fails to teach by anticipation or by combination the following claims limitations:

“an additional node different from said at least two disconnectable nodes, said additional node connected to said monitoring apparatus and allowing a fault state to be produced deliberately in said disconnectable nodes by feeding a faulty signal into said data ring in the direction of the data traffic in order to activate a loop initialization procedure.”

The closes prior art US 4,888,256 teaches an intentional insertion of a faulty signal into a data ring, however it does not discloses the rest of the above recited limitations.

Furthermore, the insertion of the faulty signal happens in the nodes of the ring, as opposed to the additional node different than the disconnectable nodes, as claimed. The next closes prior art US 4,498,082 discloses a monitoring unit and additional nodes, however fails to disclose any of the other features. Thus the combination would not yield all the claimed elements, nor could a person of ordinary skill make a combination of the above references.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
